

# INTRODUCTION

GGFinance is one of the most exciting projects in the Decentralised Finance (DeFi) space in 2020. The soon to be launched application is an all-in-one platform that enables users to stake, lend, borrow, invest, and provide liquidity among other features for high returns. GGFinance's multiple functionalities are enabled by the project's ground-breaking technology that makes it stand out among its peers.

# **GGFINANCE SOLUTIONS FOR CURRENT DEFI ISSUES**

DeFi has undoubtedly changed the financial sector landscape with some novel products and services that eclipse the offerings in the mainstream finance market. These new exciting products have seen more people flock into the space looking to grab the opportunity to make extraordinary returns on their investments. Unfortunately, the existing DeFi platforms have been unable to cater for this explosive demand due to their inherent design limitations. Moreover, most of these platforms offer only one or a few products and/or applications. As a result, investors are forced to constantly shift across multiple applications to engage in separate activities like lending and staking among others. GGFinance is addressing these challenges with their one-stop-shop for all DeFi products through which users can access all offerings within the space. To achieve this, GGFinance is focused on the following mission and vision:

**VISION** 

GGF inance will champion decentralisation and give power back to the people by allowing themto make future oriented investments for financial freedom.

**MISSION** 

GGFinance will become the leading financial technology offering a brighter future through generation of trust and cooperation with the users for long term prosperity. In line with this mission and vision, the GGFinance platform is established on these key tenets that make it the most attractive DeFi protocol.

GG Finance has many features which make it an attractive DeFi protocol, below is a list why it is poised to be one of the next big players in the DeFi space.

#### **ACCESSIBILITY**

GGFinance underlying infrastructure supports the provision of multiple pools and staking options for any user in a decentralised manner. The platform features an appealing interface that is easy to use with detailed instructions.

#### **SECURITY**

The GGFinance employs multiple layers of security features that safeguard their users funds and shields the platform from external attacks. This not only promotes security but also enhances transparency which is critical in the DeFi ecosystem.

#### **NOVEL GOVERNANCE MODEL**

GGFinance has developed an ingenious blockchainbased voting mechanism that supports the diverse choices of its decentralized user base. This system eases governance on the protocol with costless public voting.

#### TRUSTLESS PROTOCOL

GGFinance is dedicated to upholding the true spirit of decentralisation that in turn guarantees trustless transactions that are key in the DeFi space. The GGFinance smart contracts are fully audited and verified to eliminate any doubts about potential exploits or mishandling of users funds.

#### **STAKING**

The breakdown of the speaking mechanism to work as follows

Stake Entry fee 1.5% (used for buyback and burn)
Unstake fee 0.5% (used for buyback and burn)
Minimum stake let lock 72 hours

#### **FARMING**

Farming has been one the primary attributes accelerating the defi space. To put it simply, farming is a way to generate rewards with cryptocurrency holding. Farming through GGF allows you to earn rewards by providing liquidity in a variety of pools with details soon to be released.

## **Staking Process:**

Example: An investor stake 100 tokens in the platform, Upon staking the tokens the protocol will deduct 1.5% from the initial 100 tokens thus leaving a balance is stake for a month period, the user will then earn 5.91 tokens on their stake. If the investor decides to unstake after the 1 month period, the system will be then detect the 0.5% unstaking fee from the original 98.5 tokens. This will provide a net return (after fees) of 3.9175 tokesns.

Calculation (100-1.5)x1.06)-0.495=GGF

GGF will be releasing the first GGF farming pool in late November 2020

#### **STAKING**

Investors can earn interest by staking various cryptocurrencies with 0.22% per day, 6.6% per month, 80% APY. This is a simple yet profitable means of earning passive income as compared to keeping your money in fiat or in idle cryptocurrencies.

#### **FARMING**

Users earn fees by providing liquidity on Uniswap and then staking those Uniswap tokens to earn farming tokens on GGFinance. Investors are open to using their earned fees and harvested earnings to buy back the GGF tokens effectively raising the buying pressure which serves to stabilise its price.

### **GGSWAP**

Ggswap is the native swapping platform. It enables users to earn fees by providing liquidity and swapping tokens with lower fees than other platforms under audited smart contracts. GGswap serves as another option that investors can pursue to earn additional passive income on GGFinance.

#### **LENDING & BORROW**

The GGFinance platform allows anyone to borrow or lend in a decentralised manner. Lenders earn interest for providing liquidity on the network while borrowers can easily access loans by providing collateral in the provided pool. This is a win-win for both borrowers and lenders.

#### **GAMING**

GGFinance features an in-built online casino that is perfect for both novice and seasoned gamers trying their luck or looking to make it big time. The casino has a multitude of games to keep users engaged while waiting for their stake to generate money or to earn tokens from farming. What's even better? GGF tokens holders get a share of profit generated from the casino gaming. This profit will be distributed on a monthly basis.

#### **LAUNCHPAD**

The platform will have a Launchpad that interested projects can use to launch their ICO coins. GGFinance will aid in marketing projects launched on their Launchpad through their community and renowned influencers within the space. All potential ICO projects will be taken through a thorough examination by GGFinance experts prior to launch to prevent fraud and eliminate scams.

#### **INSURANCE**

The cryptocurrencies space is very risky, with the relatively newer DeFi sector carrying even greater risk. GGFinance understands this and therefore has created an insurance scheme to minimise the risk for investors on their platform. This will help them to trade with peace of mind as their capital and returns are shielded from the wild swings synonymous with the DeFi sector.

#### NFTS PLATFORM EXCHANGE

Non-Fungible Tokens (NFTs) have grown in popularity recently, becoming the latest trend in the cryptocurrency space. However, most NFT holders are stuck with them as they lack an avenue for trading them and exchanging value. GGFinance is creating a feeless NFT platform exchange to enable buyers and sellers to trade more easily. Users are only required to own a small amount of GGF for use to pay for the advertising slot when they enter the market.

## **GGFINANCE TOKEN SALE**

GGFinance public token sale is coming soon providing a lifetime opportunity to get a stake into this revolutionary platform that is going to shape the DeFi landscape in the coming years.

Meanwhile, the private sale has already started presenting an early bird opportunity to obtain GGF at a lower price than the rest of the market.

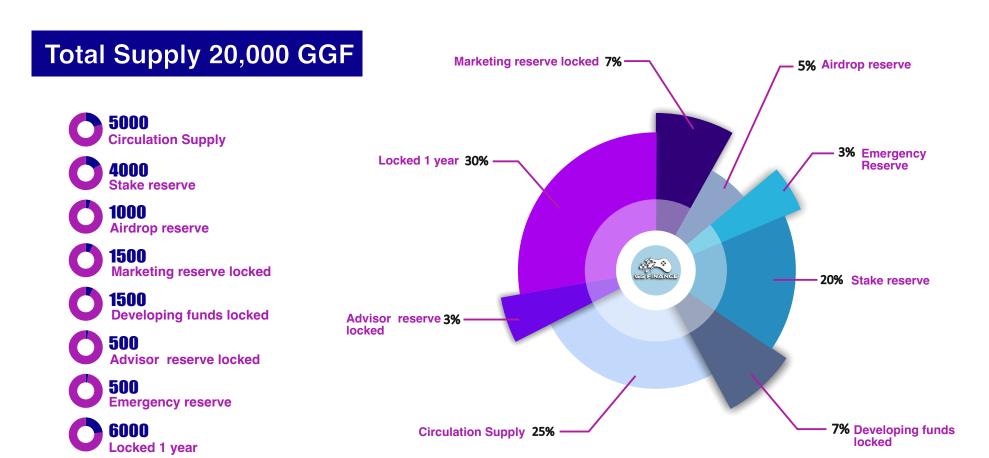

The Presale price is 1ETH = 20GGF with a maximum of 50ETH allowed for an individual address. 80% of Presale funds and all unsold tokens will be moved to Uniswap. 20% of the Presale funds will be kept as reserve for development on the Farming and Lending platform

The public sale will be launched on Uniswap at a price of 1ETH - 10GGF, double that of the presale. So, grab the opportunity to double your investment by signing up for the presale through this link https://bounce.finance/join/swap/3268

GGFinance has developed its native token, GGF, on the Ethereum blockchain, that will be used to facilitate transactions on the platform

# **TOKENOMICS**

The GGF token contract has been successfully audited to ensure that everything is locked up under smart contract and 100% transparent to the community.
